

COVID-19 Community Update - 7/10/20

Friday, July 10, 2020

The PebbleCreek Golf Operation was informed on July 10, 2020, that a golf maintenance employee has received a lab-confirmed, positive test for COVID-19. The last date the employee worked on the premises was July 7, 2020. The job performed by this individual is solitary and outdoors, and there is very little contact with other staff members that occurs. The chance for this individual to have had interaction with homeowners is even less. Any individuals that this employee believes they may have had contact with have been notified. The employee is currently quarantined in compliance with state health department guidance. For reasons of privacy and confidentiality in CDC, EEOC and HIPAA guidance, we are not permitted to share the employee's name or any additional health information.

The well-being of PebbleCreek residents and staff is our highest priority. We continue to follow protocols and guidelines established for COVID-19 from the CDC, Arizona Department of Health Services and other governmental agencies. Measures implemented include employee screenings before shifts, the use of personal protective equipment, and the disinfecting/sanitizing of work areas.

We will continue to update you if we have further important information to share.

Thank you,
Bill Barnard
General Manager
