

## **COVID-19 Update – Nov. 5, 2020**

HOA Management has been notified by three staff members of Patrol that they received a lab-confirmed positive test for COVID-19. The last time these individuals worked was Oct. 29, 2020, in one case, Oct. 30 in another, and Nov. 1, 2020, in the third case. These individuals have limited contact with others in their role as a roving patroller.

These staff members are complying with quarantine protocols per Centers for Disease Control (CDC) Guidance. For reasons of privacy, and confidentiality in CDC and EEOC guidance, the employee names and health information cannot be shared.

The well-being of all PebbleCreek residents and staff remains our highest priority. Protocols that include employee screenings before work shifts, use of personal protective equipment and the sanitizations of work areas remain in place for all staff.

We will continue to update the community on any issues related to COVID-19.
