

COVID-19 Update – Oct. 27, 2020

Tuesday, October 27, 2020

HOA Management was notified on Monday, Oct. 26, 2020, that a member of the staff at Toscana's received a lab-confirmed positive test for COVID-19. The last time the individual worked was Oct. 23, 2020. This individual does not have any contact with cooking, preparing or serving food in any way, nor do they have contact with residents in their job function.

The staff member is complying with quarantine protocols per Centers for Disease Control (CDC) Guidance. For reasons of privacy, and confidentiality in CDC and EEOC guidance, the employee's name and health information cannot be shared.

The well-being of all PebbleCreek residents and staff remains our highest priority. Protocols that include employee screenings before work shifts, use of personal protective equipment and the sanitizations of work areas remain in place for all staff.

We will continue to update the community on any issues related to COVID-19.
