

# Community Advisory - Masks and Social Distance on Sports Courts, and More

Thursday, June 25, 2020

---

## Masks

We recently received some requests to clarify mask usage requirements for sports courts. As you approach any sports courts facility, you must have a mask on at all times, and when you are within at least six feet from any other person, (except your spouse or member of your household). The only EXCEPTION is when you are in the actual act of PLAYING the game. When you come off the court, the mask needs to go back on immediately. And it needs to be on if you stay after/arrive early, if you are within six-feet of one or more people who are not your spouse or member of your household. Not only is this a government mandate, wearing a mask is something you can do to help protect yourself and others from spreading COVID-19. While this communication is focused on sports courts, if you have questions about mask usage in other areas of the community, our Communications Team has created a reference tool for anyone who needs further clarity. This reference document also notes the current operational status of HOA facilities. Click here to view [COVID-19 Mask, Social Distance and HOA Facility Status Reference Resource](#).

## Social Distance

On Monday, June 22, in keeping with the recent proclamation from [the county](#) and [the city](#), and to help residents maintain social distance, the HOA Board and management team removed tables and chairs from the sports court areas. This was done to help avoid complaints from other residents that may endanger the continued utilization of the courts.

## Sanitization

The HOA housekeeping team is working hard on a daily basis to regularly sanitize all facilities, especially those where numerous people are visiting, like sports courts, pools, fitness centers, etc. With that in mind, all residents are reminded that if a staff member approaches a facility, sports court, etc., to sanitize, you are asked to yield to that process. We have had a number of instances where residents have attempted to interfere with the sanitization of equipment or facilities, in some cases attempting to keep that staff member from completing the work in the area.

### **COVID-19 in PebbleCreek**

On June 24, a community-wide message was sent out notifying residents that cases have started to be reported here in the community. The individuals reported their circumstances with the goal of being of service to others, and to help everyone understand that the virus is real, and now present here in the community.

With all of this in mind, the HOA is doing everything possible to help maintain a balance between safety and the ability for amenities to stay open. However, if residents using any HOA facility continue to ignore mandates for mask usage and social distance, the HOA Board may have no other choice but to modify amenities usage and availability. Only you, as an individual, can help control what happens next.
